

Location 1

Target Dragon Wrap Abbots (Pre-Period Demeaned) — Observed vs. Predicted, with the Pre/post Averages

Purple: each equal window's pre/post average per day with orders (written above it), drawn as weekly totals.

Each week is the average times the week's days with orders in the window, so the line dips in weeks with fewer of them and at a window's edge.

Bottom: the training weeks from four weeks before the windows to four after. Launch 1: Chicken roll; launch 2: Dragon wrap.
