

Location 1

Target Vegan Pulled Chicken — Observed vs. Predicted, with the Pre/post Averages

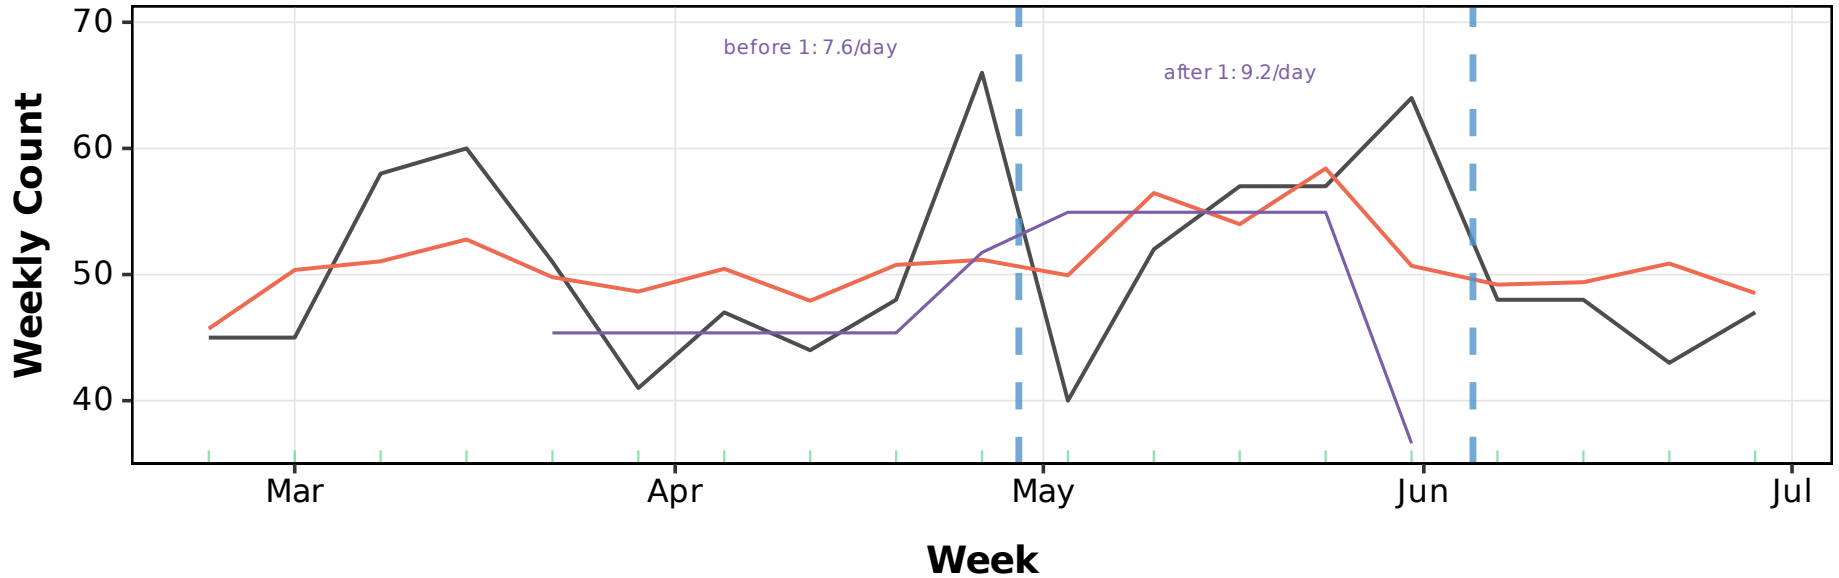

Training Data

Test Data

Training Data, Around the Windows

— Observed — Predicted — Pre/post averages

Purple: each equal window's pre/post average per open day (written above it), drawn as weekly totals.
Each week is the average times the week's open days in the window, so the line dips in weeks with closures and at a window's edge.
Bottom: the training weeks from four weeks before the windows to four after. Launch 1: Chicken roll; launch 2: Dragon wrap.
